SKILLS

Languages: JavaScript, TypeScript, Python, SQL (familiarity: C#, Dart)

Web & Backend: React.js, Next.js, Node.js, Express.js, NestJS, REST API design, JWT, Socket.IO, GSAP

Mobile & Cross-Platform: Flutter, React Native, Expo, native modules (Kotlin, Objective-C++)

Data & Infrastructure: PostgreSQL, MongoDB, Redis, ClickHouse, Docker, Nginx, Firebase

Tools & Engineering: Git/GitHub, Claude Code (AI-assisted workflow), Playwright, Swagger/OpenAPI, Zod, JIRA

EXPERIENCE

Coshi Infrastructure | *Junior Developer* | Causeway Bay, Hong Kong (Remote) | Mar. 2026 – Jul. 2026

- Delivered assigned modules across several web stacks.
- Worked asynchronously with a distributed team across time zones, keeping every module strictly on schedule.

SourceLabs | *Web App Intern* | Lahore, Pakistan | Jul. 2025 – Sep. 2025

- Engineered full-stack product features utilizing **MongoDB, Express, React and Node.js**.
- Architected scalable **REST** endpoints and component-based **React** interfaces with consistent client-side state management.

PROJECTS

Company's Voice Portal | *React, Vite, Tailwind CSS, Node.js, Express, MySQL, JWT, PDFKit, REST API*

- * Built a **billing and invoicing platform** that syncs accounts, rate plans and usage from a provider API, prices every record against the client's own plan, and issues **PDF invoices** in the operator's existing layout.
- * Implemented the **rating and tax engine** end to end, covering per-destination rounding, an ordered tax chain and non-compounding arrears, plus usage import and SMTP invoice delivery.

RTP Logger | *NestJS, ClickHouse, Prisma, React, Material UI, Vector, Docker*

- * Built a self-hosted **log analytics platform** ingesting high-volume binary and text feeds into **ClickHouse** through Vector and goflow2, replacing an **Elasticsearch/Logstash** stack on hardware that could not afford it.
- * Delivered a **NestJS** API with **JWT** auth and role-based access, and a React explorer with time-range search and dashboards; shipped both Docker Compose and native systemd deployments.

Company's CRM | *Express, Prisma, PostgreSQL, MySQL, Redis, Socket.IO, React, Redux Toolkit*

- * Contributed to a **multi-tenant SaaS CRM** integrating a third-party call-centre platform over its own database and event feed, with organisation-scoped access enforced in middleware.
- * Built **live agent wallboards** on Redis-cached state pushed over **Socket.IO**, with Recharts supervisor dashboards reporting real-time queue and agent metrics.

ColorVista | *React Native, Expo, TypeScript, Flask, OpenCV, Firebase, Azure*

- * Built a **colour-vision screening and assistive app**: a 22-plate Ishihara test scoring the red-green and blue-yellow axes independently to name a deficiency type, gated behind a lighting and viewing-distance checklist so a result means something.
- * Shipped **live camera colour naming** and image correction across a 47-colour HSV-mapped palette, served by a **Flask/OpenCV** API on Azure and kept lossless end to end.

Apni Fasal | *Flutter, Firebase, WebRTC, Cloudflare R2*

- * Built a **two-sided agriculture platform** (farmer and agronomist roles from **one Flutter codebase**) covering consultation booking, soil lab requests, reports and chat.
- * Gated the directory behind **admin credential verification**, and kept documents in **Cloudflare R2** so a profile read stays a profile read; consultations escalate to **WebRTC** video only when a chat thread is not enough.

EDUCATION

COMSATS University Islamabad, Lahore Campus

Bachelor of Science in Software Engineering

Lahore, Pakistan

Graduated Jun. 2026

Punjab Group of Colleges

Intermediate in Computer Science

Lahore, Pakistan

Oct. 2020 – May 2022
